

The Guitarmalade S.A.U.C.E. Method

1. Option 1:

S – Study (Steal)

(Study your heroes. STEAL their ideas! Transcribe. Analyze. Understand their vocabulary.)

A – Assimilate

(Practice and internalize through warmups, application, and experimentation.)

U – Utilize

(Play over chord progressions. Transpose. Record. Rate. Apply your tools.)

C – Compose

(Write your own material. Craft solos. Develop your voice with intent.)

E – Elevate

(Push your limits. Seek mentors. Cultivate belief through self hypnosis/mantras/subliminal audio. Level up your identity.)

CORE

Levels 1-3 (or 5) - including list of chord progressions

Application

Transpose, transcribe, record, play with more advanced musicians

Mind Management

Belief: I AM

“I am so thankful that I...”

Identify the elements of the musicians and guitar players that you love, learn (transcribe or find tab or manuscript) 3-5 elements of their lead playing that you love and want to assimilate into your own playing

Ask yourself what would I have to practice in order to have a complete control over this concept (for example, pedal tone, spread voicings, double stops, 2 note per string sliding arpeggios).

Develop that warmup/review with *guitarmalade’s reverse engineering checklist*.

Transpose to CAGED Keys and/or Bb and F

Play over common chord progressions

Record takes of yourself improvising over backing tracks and utilize 1, 2, 3 and more concepts, licks and techniques - rate yourself.

Compose solos incorporating bag o tricks elements Seek out musicians who are more advanced
